

The Lightest, brightest, most reliable lights. Period !
Made in the U.S.A

Seca 900

Light & Motion team riders are raving about this light and its remarkable performance, featherweight 200 gram head and ideal beam pattern.

The Seca 900 features our 6 cell Lithium ion pack. This is a great lightweight package that delivers 2.5 hours of run time on high from a 320 gram pack.

Drop down to medium power (450 lumens) and your run time extends to 5 hours!

The Seca 900 utilizes 6 Cree R2 LEDs, the highest rated LEDs available, combined with our custom designed reflector to deliver all that power into a beautifully sculpted beam with a deep spot and even flood.

One of the key advantages of Light & Motion's engineered lights is any of our 11.1v Lithium-ion batteries can run the Seca. Add a 3-cell Li-ion pack as a back up and you have an extra 70 minutes of high powered light.

Light & Motion is the only company that offers interchangeable batteries and lights.

Seca 700 Ultra / Seca 700 Race

- Custom Engineered Reflector
- Optimized Beam Pattern with Broad Coverage and Long Line-of-Sight
- Includes True Multi-Chem Smart Charger
- Short 3.0 hr. Recharge Time Seca Race: 2.5 hr. Recharge Time
- System Weight (including mount). Seca Race 686g Weight (including mount), 520g
- Low Battery Warning and Auto Shut-Off
- Multi-Sport Head Strap Compatible

Ideal for...

- Recreational Night Riding
- 24-hour Racing

Light and Motion are known for sponsoring some of the best athletes in the world. Collectively they hold six Mens 24hr World Championships, two Women's 24 hour World Championships and a World Record for completed Solo events. Other teams using Light & Motion include Subaru/Gary Fisher MTB Team, Trek/VW Factory Team and Team Sole. Pro riders such as Rebecca Rush (Winner of the Leader-ville Trail 100 and 3 x reigning 24hr solo World Champion) also rely on Light and Motion.

Stella 200L

Features

Regardless of where or how it is used, the Stella 200 packs a potent combination of power, runtime, versatility and value into its tiny chassis. A 200 lumen LED and custom engineered reflector delivers a crisp, bright pattern of light, fed by a 3-cell Li-ion battery that can run up to 50 hours on its most economical setting. The entire unit clocks the scale at a feathery 300 grams, while still retaining the multiple output settings and variable mount options of our high performance models. This is the epitome of getting more 'bang' for your buck.

Stella Dual

The Stella 300 Dual is the lightest most rideable dual system on the market with a 150 lumen spot and a 150 lumen flood. It is feather light at 300 grams while delivering 300 lumens of spot/flood combination.

Stella 150L

The Stella 150L resets the bar for lightweight powerful light. The specs are remarkable; 4 hours run time, 150 lumens of tailored light, at a featherweight 197 grams complete! It is powerful, versatile, and lightest in its class with a penetrating spot and narrow balanced fill light. The Stella 150L features our all new 2 cell Lithium-ion pack, weighing in at 128 grams. The battery features our new quick clip design that eliminates velcro with a secure rubber strap that is easy on and off.

Stella 150N

The Stella 150N packs a powerful punch at an affordable price. It boasts the same output as the Stella 150L for about the same weight but its 130 gram nickel metal hydride pack delivers 2.5 hours vs the Stella 150L's 4 hours. But even the battery is improved for 2009 with new "low self discharge" cells, the NiMH rechargeable pack has dramatically improved life compared with conventional NiMH batteries.

Stella 120

The Stella 120 features a bright yet frugal LED and custom reflector, operated by a simple on/off switch. A super dependable 4-cell NiMH battery fires the thing up every time the button is pressed, and provides a lightweight but durable power source, all at a bargain price. Wrapped up in a flyweight package, no less (seriously, this whole light weighs less than the batteries on several of our other lights).

Vega 200

Features

- High-Performance LED
- Multiple Output Settings
- Integrated System with Convenient Self-Contained Battery
- Smart Charger with Auto-Shutoff
- 2.0 hr. Recharge Time
